

Amendments to the Specification:

Please amend the title of the invention as follows:

A LOCKING DEVICE OPERATED BY TWO ~~PULSES~~ PUSHES

Please amend the sixth paragraph on page 12 as follows:

To release the cover, the user applies a second push to the cover which, in the same manner as previously, imparts an oblique movement to the ~~cover~~ follower 14, this time along the oblique edge 33 of the peninsula 28 until the follower 14 comes into abutment against the stop edge 35 of the peninsula 28.
